EDUCATION

Carnegie Mellon University

Bachelor of Science in Information Systems | GPA: 3.8/4.0

Aug 2021 - May 2025

Pittsburgh, PA

Relevant coursework: Computer Networks, Computer Systems, Functional Programming, Imperative computation, Matrix Algebra, Databases, Concepts of Mathematics, Designing Human-Centered Software

EXPERIENCE

Google

Software Engineering Intern

May 2024 - Aug 2024

Mountain View, CA

- Streamlined C++ classification and labelling pipeline in the Ads-Safety Infra team to allow manual control over an automated system
- Robustly tested distributed system at scale that affects up to a trillion entities
- Significantly reduced potential response time in the case of a customer escalation from 2 days to <6 hours, saving developer time and ads revenue

Bentley Systems

Software Engineering Intern

May 2023 - Aug 2023

Pittsburgh, PA

- Lead the migration of the IO layer of conceptstation, from Feature Manipulation Engine (FME) to GDAL to handle importing files
- Wrote robust C++ code and application wide tests to seamlessly handle all file types, including OSM, SHP and ESRI
- Gained familiarity with GIS software, including transforming coordinate systems, map reprojections, buildings and other 2D/2.5D/3D data

PROJECTS

Portfolio Site 🌐

Winter 2022

- Built interactive portfolio site from scratch with **React**, JSX, HTML and Tailwind CSS
- Optimized site loading speed by 80% using custom hooks, lazy/asynchronous loading and proper package management
- Tested site across browsers and devices to ensure mobile responsiveness and cross-browser compatibility

Youkaryote 🌐

Spring 2022

- Researched and implemented hexagonal-based RTS game in **Python** to teach the basics of cell biology
- Engineered pseudo-random map generation adapting Cellular Automata and Prim's Shortest Spanning Tree algorithms to a hexagonal-based map. Coded complex A.I. behavior with Dijkstra, A*, and Monte-Carlo

ÉDÉ

Summer 2020

- Developed full-stack application that generates schedules to facilitate language learning
- Launched Microsoft Azure back-end with **Flask**, **SQL** and **JavaScript** to curate personalized schedules based on user goals

ACTIVITIES

CMU BTG

Engineering Team Lead

Aug 2022 - Current

Pittsburgh, PA

- Lead team of engineers on implementing full stack application for detecting gym occupancy

The Tartan (Carnegie Mellon Newspaper)

Lead Photo Editor

Sep 2021 - Current

Pittsburgh, PA

- Manage team of photographers for a publication with over 4000 copies in circulation

SKILLS

Software: React, C, C++, Python, SQL(Postgres), MongoDB, C#, Java, Git, HTML/CSS.

Language: English and Yoruba (Native), French (Fluent).
